Does gradient boosting improve quantile-mapped SEAS5 rainfall forecasts?

38 provinces of Indonesia | test years 2005–2024 | leads 1–6 months | models trained only on earlier data

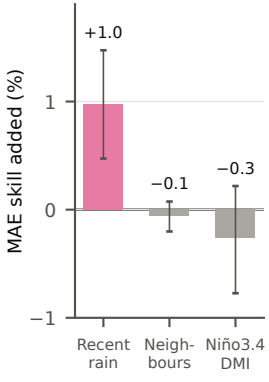

1 Quantile-mapped SEAS5 (EQM) vs climatology, lead 1

2 Gradient boosting and the average, relative to EQM

3 Added predictors, lead 1

Map lines delineate study areas and do not necessarily depict accepted national boundaries.
